Benchmark Compounded Benchmark Triodos Impact Mixed Fund - Neutral

SFDR article 9

The fund has sustainable investment objectives aligned with SFDR article 9 criteria. These objectives are:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

Triodos Impact Mixed Fund - Neutral aims to generate positive impact and competitive returns from a concentrated portfolio of global equity positions and investment-grade corporate, sovereign and sub-sovereign bonds.

The fund invests in a balanced mix of bonds (including impact and other corporate bonds and government bonds) and equities of companies in developed countries. These companies and the proceeds of the impact and corporate bonds must contribute to, or finance projects in, at least one of the following transitions: resource transition, energy transition, food transition, societal transition or wellbeing transition. Bond investments must be investment grade and denominated in EUR.

Highlights

- Triodos Impact Mixed Fund - Neutral generated a return (after costs) of -1.94%, while the benchmark yielded -1.77%.
- Global capital markets were under pressure as investors reviewed their interest rate scenarios. Inflation seems to be sticky and the FED is not in a hurry to relax its policy. Equity markets found some counterbalancing support in a positive earnings reporting season so far.
- The fund handed in performance as both bonds and equities lost ground in line with the markets. Q1 numbers set the tone for individual outliers; Resmed (+14%), Shimano (+11%), Essity (+7%) on the positive side and Adyen (-29%), Enphase (-10%) and Edwards (-9%) as detractors. The fund remains to be geared to overweight positions in Consumer Staples, Health Care and higher quality, euro dominated bonds. All investments contribute to the Triodos transition themes.

Top 3 SDGs of the fund

All our investments contribute to one or more of the UN SDGs. For equities and corporate bonds, this contribution is based on the % of revenues from products and services with positive impact. For impact bonds the contribution is based on the % of the proceeds used to fund assets and/or projects with positive impact. The maximum score is 1. The contribution data for the benchmark is not yet available. We strive to publish this data later this year.

Contribution Transition Theme

All our investments contribute to one or more of the five transitions. For equities and corporate bonds, this contribution is based on the % of revenues from products and services with positive impact. For impact bonds the contribution is based on the % of the proceeds used to fund assets and/or projects with positive impact. Sovereign bonds are out of scope, as these are not impact investments. The overall positive contribution of the fund is 68.4%.

Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO2 per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio. Non-recycled waste ratio: For each company the non-recycled waste ratio is the total amount in metric tons of non-recycled waste produced divided by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Risks

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. The product may be exposed to risks, such as concentration risk, currency risk and interest rate risk. This product does not include any protection from future market performance so you could lose some or all of your investment.
