

**IMPACT HIGHLIGHTS**

# Triodos Euro Bond Impact Fund

The fund generates positive impact through investments in investment-grade bonds issued by listed companies, semi-public institutions and EU member state governments.

## Sustainable Development Goals

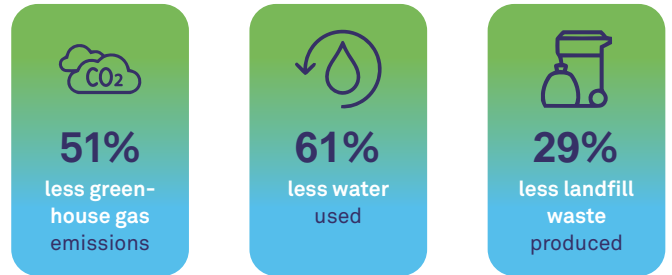

This chart plots the exposure of fund and benchmark to the SDGs, based on the underlying revenue streams of each company, aggregated at fund and benchmark level.

Source: ISS ESG as per end of December 2020.

## Ecological footprint

The carbon, water, and waste footprints of the fund illustrate the lower environmental impact of the portfolio companies' activities compared to those of the iBoxx Europe ex Sovereign Index. These figures provide an indication of the fund's sustainability performance as an outcome of the fund's strict impact selection and exclusion criteria.

The footprints are calculated using carbon emissions data from Oekom research AG, and water and waste data from S&P Trucost (© 2019 S&P Trucost Limited).

## Portfolio by Sustainable Transition Theme

## Stewardship

- 41% green and social bonds in portfolio
- 31 impact bond issuers engaged
- key engagement topics: animal testing, genetic engineering, climate change, biodiversity and arms.

**44%** of portfolio companies have set a Science Based Target to reduce GHG or CO<sub>2</sub> emissions as aligned with the Paris Agreement.
