Triodos Pioneer Impact Fund aims to generate positive impact and competitive financial returns from a concentrated portfolio of small- and mid-cap companies pioneering the transition to a sustainable society.

We select companies for their contribution to our seven sustainable transition themes. Through integrated financial and sustainability analysis we identify the drivers of a company's long-term value creation and assess the impact of ESG materiality on these drivers. Additionally, the companies we invest in must comply with the Triodos minimum standards. This product is not without risks. Please see the prospectus and the KID for more detail.

Highlights

- Triodos Pioneer Impact Fund generated a return (after costs) of -5.15%, while the benchmark yielded -3.06%.
- Global markets fell in April as interest rates continued to rise, Central Banks took a more aggressive stance towards monetary tightening as they are faced with stiff inflation on the back of war in Eastern Europe and continued supply chain disruptions as China intensified its Covid-zero lockdown measures. First-quarter earnings season kicked off and so far companies that reported have been able to pass raw material and feedstock price increases onto the end consumer, but at some point consumer spending will start to be affected. The fund underperformed its reference index in April, driven by an underweight in Energy and stock selection effect. The biggest culprit of underperformance was currency positioning, as the Japanese yen (overweight) significantly depreciated versus the US dollar (underweight).
- The fund is overweight in the Consumer Staples, Industrials, Health Care & Information Technology sectors; underweight in Energy, Financials and Real Estate. Regionally, the fund is overweight in Japan, neutral in Europe and underweight in the US both for valuation and sustainability & governance reasons.
